

# Keri-Aperio™ Wireless Door Lock System

*Keri Systems has partnered with ASSA-Abloy to offer a unique door access control solution that offers the building manager the ability to monitor and manage access to all doors without the need for significant re-wiring of the building.*

**Aperio™  
wireless  
network hub**

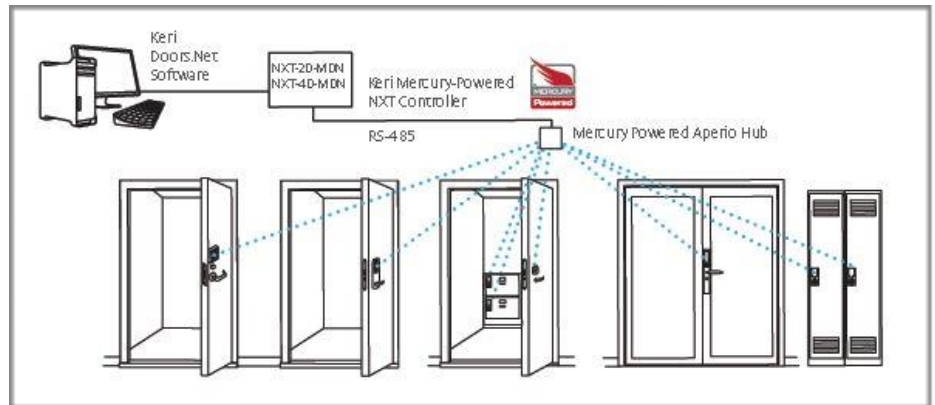

**Aperio™  
door lock**

The heart of Aperio™ is a short distance wireless communication protocol designed to link an online electronic access control system, such as the Keri doors.NET system, with an Aperio™ enabled mechanical lock.

### Key Installation Benefits:

- Uses very few components.
- Installation is straight-forward due to internal batteries.
- The wireless installation means minimum modification to doors and walls.

### Full Remote Management Capability:

The Aperio™ system allows you to configure and manage access through all doors in your premises:

- Provides a PC based access control management over a wireless network.
- Can be easily customised to suit your requirements.
- Intuitive user interface with lots of right click menus for fast and smooth operation and control.
- Full printed reporting capability.

*Access Technologies is the Western Australian distributor for Keri Systems, and an authorised re-seller of the ASSA-Abloy Aperio™ system. Call for a no obligation quote today!*
